Effective: September 22, 2026

**STANDING ORDER REGARDING THE USE OF GENERATIVE ARTIFICIAL
INTELLIGENCE (“AI”) IN COURT FILINGS**
N. Reid Neureiter, Magistrate Judge

In cases before this court in which the parties have **consented** to magistrate judge jurisdiction, **every filing** shall contain an AI Certification regarding the use, or non-use, of generative AI (such as ChatGPT, Harvey.AI, or Google Gemini) in preparing the filing, signed by all individuals who contributed to the drafting of the filing. To the extent that generative AI was used in any drafting of the filing, each individual must certify that any language drafted by AI (even if later edited by a human) was personally reviewed by the filer or another human for accuracy and that all legal citations reference actual non-fictitious cases or cited authority. The AI Certification does not count against any page limitations. All filings remain subject to Federal Rule of Civil Procedure 11, 28 U.S.C. § 1927, and applicable ethical rules.

In cases in which this court is in the **referral** role, this order applies only to opposed motions that are referred to this court.

The court will strike any filing that does not comply with the AI Certification requirements described above.

Because an AI filing can be generated with little to no cost or time expenditure but still impose significant costs of time and energy on the opposing party and the judicial system in responding to and resolving the pleading or motion, in appropriate cases, the court will consider awarding attorney fees to the opposing party where it appears that a filing using generative AI lacked substantial justification.

Finally, counsel and parties are also encouraged to review Magistrate Judge Maritza Dominguez Braswell’s “Guidance on AI Hallucinations”: [MDB AI Guidance.pdf](#).
